SUMMARY

Information Systems graduate from UNIKOM Bandung with a strong interest in Data Analyst and Business Analyst roles. I am experienced in processing and visualizing data using Excel, Power BI, and Tableau, which I have applied in several personal data projects, supported by a foundational understanding of SQL and Python. To me, data is a tool for uncovering insights that can support better business decisions. I am currently open to internship or entry-level opportunities in data and Business Analysis.

PROJECTS

Retail Sales Dashboard

Excel — Apr 2026

- Developed an interactive sales dashboard to monitor transaction performance across 3 branches (Mandalay, Naypyitaw, Yangon), enabling real-time performance tracking.
- Implemented a dynamic filtering system based on city, customer type, product category, and payment method using slicers to accelerate data exploration.
- Visualized key performance indicators (total revenue, units sold, average rating) alongside monthly sales trends in a single integrated view.
- Analyzed top-performing products by category and payment method preferences to support strategic business decision-making.

US Flight Delay

Tableau — Jun 2026

- Developed a geospatial dashboard to analyze US flight delay patterns from 2017 to 2022, supporting operational trend analysis.
- Mapped delay distribution across airlines geographically using interactive map visualization to facilitate root-cause identification.
- Identified the contribution of five delay factors (carrier, weather, NAS, aircraft, security) to total delay time as a basis for root-cause analysis.
- Analyzed monthly delay trends over a five-year period to identify seasonal patterns.
- Processed a large-scale dataset comprising thousands of flight records to produce comprehensive and reliable analysis.

Supermarket Profitability Dashboard

Power BI — Jun 2026

- Developed a sales profitability dashboard based on a supermarket dataset to support comprehensive business performance evaluation.
- Calculated and visualized profit, net revenue, and gross profit margin (GPM) metrics by product category as a basis for decision-making.
- Analyzed the correlation between customer ratings, sales volume, and category performance to identify improvement opportunities.
- Evaluated daily and monthly profit trends to identify an upward pattern toward the end of each quarter.
- Reviewed customer payment method preferences as a strategic indicator of shifting transaction behavior.

EXPERIENCE

Syamil Group — Part Time

UI/UX Designer — Nov 2025 – Feb 2026

- Designed responsive web dashboards based on the requirements of an asset management system.
- Created user interface designs in Figma based on team direction and requirements.
- Developed wireframes and simple prototypes to illustrate the system's user flow.
- Assisted in adjusting designs based on discussions with the development team.
- Supported the creation of Google Analytics dashboard views for monitoring system usage.
- Maintained design consistency to ensure a clean and user-friendly interface.

BPSDMP Komdigi — Part Time

Web Developer Intern — Aug 2025 – Oct 2025

- Independently developed a training request web application with role-based access for two user types (admin and participant), under mentor guidance.

- Built the front-end interface using HTML, CSS, and JavaScript to support CRUD features for the training request, approval, and rejection process.
- Designed the database structure using Google Sheets and developed back-end logic with Google Apps Script (JavaScript).
- Created a KPI report to track total submissions, approval rates, and rejection rates, supporting system performance monitoring.

EDUCATION

Universitas Komputer Indonesia (UNIKOM) Bandung, Indonesia
Bachelor of Information Systems, ***GPA 3.70/4.00*** Sep 2022 – Sep 2026
Relevant Coursework:

- Business Process Analysis
- Data Structures
- Web Programming
- Operating Systems
- Database Systems
- Algorithms and Programming
- Software Engineering

ORGANIZATIONAL EXPERIENCE

Student Activity Unit Futsal Nov 2023 – Okt 2024
Chairperson, UNIKOM Futsal Student Club

- Led and managed club activities to support the development of students' interests and talents.
- Planned and oversaw the implementation of work programs and annual club activities.
- Represented the club in internal campus forums and external events.
- Built partnerships with internal and external parties to support club activities.
- Mentored members and fostered a collaborative and productive organizational environment.

CERTIFICATIONS

BNSP Associate Data Analyst Certification by LSP Informatika Feb 2026

- Certified competent in Data Analytics with an Associate Data Analyst qualification, covering 6 competency units: Data Collection, Data Review, Data Validation, Data Object Determination, Database Access Implementation, and Data Visualization.

Python Fundamental for Data Science by DQLab Okt 2025

- Learned Python programming fundamentals for data processing and analysis, covering data structures, basic operations, and library usage for data science purposes.

UI/UX Design Mastery by Skilvul Jul 2025

- Completed a mobile app design case study, "Kelas Online," covering the full UI/UX design process from user research and wireframing to prototyping.

SKILLS & TOOLS

Soft Skills: Time Management, Communication, Teamwork, Leadership, Problem-solving, Adaptability.
Hard Skills: Basic Database Management, ETL (Extract, Transform, Load), UI/UX Design, Web Design.
Tools: Power BI, Tableau, Microsoft Office, Spreadsheet, Figma, Canva, MySQL, Notion, Capcut.
Languages: Indonesian (Native), English (Intermediate).
